INTRODUCTION:

PROJECT OBJECTIVE :

The main objective of this system is to help organizations reduce time and effort by efficiently managing and distributing tasks among employees through a centralized platform. The system enables management to assign and monitor tasks efficiently . Additionally , it helps employees stay organized by keeping track of their assigned tasks , reducing the chances of forgetting any responsibilities , and allowing them to follow up on their work consistently.

TARGET USERS :

This system is designed for owners of small to medium-size businesses that rely on task-based workflows. It is used to track ,manage ,and monitor tasks on a regular basis , ensuring better organization and continuous follow-up of work activities.

PROBLEM STATEMENT AND SOLUTION :

Many companies face challenges such as task disorganization , forgetting important tasks , and lack of proper follow-up. This system is designed to solve these issues by providing a structured platform that ensures continuous task tracking and clear task distribution among employees. It helps reduce errors and improves communication within the organization , leading to better overall productivity.

SYSTEM STRUCTURE :

LOGIN PAGE :

Allows users to securely log into the system using their username and password.

SIGN UP PAGE :

Enables the creation of a new employee account by entering the required information.

EMPLOYEES INFORMATION PAGE :

Displays a list of all employees along with their information, such as ID, name, and job title.

ADMIN PAGE :

Provides full control to the administrator, including:

- Adding and deleting employees
- Creating and deleting tasks
- Monitoring task progress
- Sending messages to specific employees
- Viewing task reports for each employee

EMPLOYEE PAGE :

Allows employees to:

- log into the system
- View their assigned tasks
- Update task status (Completed or In Progress)
- Communicate with the admin by asking questions
